

The Rutgers DSW Program

Module Title: Coding Workshops

Instructor:

Residency: Spring 2019

Date:

Module Description:

In these modules, through presentation of their own and other students' work, students will continue to learn the various aspects and methods of qualitative data analysis with an emphasis on coding for thematic analysis.

Module Objectives:

As a result of this module, students will:

- 1) Increase their understanding of data analysis methods
- 2) Gain confidence in their data analysis skills.

Required Readings:

LaSala, M. C. (2015). Condoms and connections: Parents, gay and bisexual youth and HIV risk. *Journal of Marital and Family Therapy, 14*, 451-464.

LaSala, M. C., Fedor, J. P., Revere, E. J., & Carney, R. (2016). What parents and their gay and bisexual sons say about HIV prevention. *Qualitative Health Research 26*, 1519-1530.
